ture, English Feared On | Indian Music On **Kol Yisrael Tonight**

10:15 e'clock tonight by the Kol a "back-seal" language. One of the main causes is the acute shortage of English speaking teachers, especially of those who teach English.

Every year fewer young men and women from English families go into the teaching profession because of more attractive openings elsewhere. In many English-medium schools Afrikaners are teaching English, Last week an organized effort on a national basis was launched to strengthen English-medium education and attract more English teachers. One of the aims of a new body called the National Council for English Education is to recruit English teachers in the Union and in Britain, and a few months ago the Transvala Teachers' Association launched a drive to attract recruits.

The deterioration of English is

to attract recruits.

The deterioration of English has gone on parallel with the viscorous growth of Afrikaans, which has been fostered by the seal of a dosen cultural organizations and the enthusiasm of an ambitious people, inbued with a wolk' ideal. While a few years ago one rarely heard Afrikaans apoken in the cities, it is now spoken in the cities, it is now spoken everywhere, in offices, shope and factories.

BIG ATTRACTION IN TEL AVIV JINO DIK

tember I at 1955 of the level commander who alerted the Arab Legice Heedquarters, which sent a car and a cargo truck at 2102. The car hit a mine, By the light of the explosion, Israel soldless, whom a witness described as wearing khaki uniforms and berets, were even to run up, throw explosives and pump automatic fire into the car. The driver was wounded, two Legionnaires were hilled. Three more were missing. About eight to 10 misutes after the explosion, the attackers withdrew.

(a) In the Wadi el Malaki area, north-west of Beit Likya, the U.N. observers found evidence of another fire fight of some intensity. At approximate MR, 1546-1651, on the Beit Bi-ca-K arbeits road, there were pools of blood and also ammunition with Hebrew markings, including empty cartridges, including empty eartridges, three incendiary bombs, five hand grenades, two live F mortar bombs, two incendiary mines. Droppings of blood which were followed to Khirbet Kureikur on the Jordan side of the demarcation line, were seen continuing on the other side of the inc. According to Jordanian patrol and a group of about 2002 and went to the spot. The action lasted another half hour and the Israelis withdrew to the west. Three Arab Legionnaires were wounded.

Footprints Followed

1533-1519 where the tracks crossed the Beit Sira-Beit Nubaroad, there were large blood-stains and several rifle cartridges.

In view of the non-cooperation of Israel in the Mixed Armistice Commission, it was not possible to contact an Israel official before 0015Z on September 2, and transmit to him, on behalf of the Chief of Staff, a request for a cease-fire, the information that an investigation team had been sent to the area on the Jordan side, and a request that another team be sent on the Israel side. When contacted again at 0000Z the Israel official stated that firing had ceased, and that if U.N. observers went to the area they would go unofficially, since their carrying out an investigation on the Israel side would mean that Israel was participating in the MAC.

1-3 has alarmed the Jordanian enthorities and people; The raid in the Belt Likya area appears to be the culmination of a series of operations of less magnitude. During the month of August alone Jordan louged B complaints alleging triang wielation of the Jordan air-space by Jarael military aircraft, B complaints alleging firing by larael troops across the demarcation line and 19 alleging the penetration by larael patrols into Jordan territory, which occurred between the end of June and the end of August. On the basis of the investigations carried out by the U.N. observers, Israel was in its absence condemned by the Mined Armistice Commission for the following incidents:

a) On the night of June 27-5t, a small was of the Penasystia Line and carried ent a commande-type mild at an Arab Legistander, crossed the Demarcation Line and carried out a commande-type mild at an Arab Legistander, was the legistantian wore weenfeld, and and largents and l

and grupament of permissible terms but also ensure that farmed bodies of their troops should been at a reasonable distance from the arubicitice lines. The greety defeative forces to which Article VII refore should not in a manner calculated not to enue there on the other side of the description line.

In While the Iarsel crossing of the demarcation line at Khilika on August 30 appears to have arisen because of Iarsel exercises held close to the demarcation line, other incidents may be connected with the problem of Arab infiltration from Jordan. Armed raids across the botder area are, it seems, sometimes explained as retalisation against thefts or a murder, like that of the watchman of Ramat Raziel in the Jerusalem Corridor on the night of August 28 — claimed by Israel to have been committed by infiltrators from Jordan. The non-cooperation of Israel in the work of the MAC precludes may investigation by U.N. observers that could either prove or disprove these Israel allegations of thefts and murder.

Dangerous Remedy.

II. Bestillation against maranding by means of armed raids is constray to the General Armistice Agreement and is a dangerous remedy. A raid like that of Beit Liftys may result in an armed closel, which, if not story pool rapidly, may develop into hostilities extending like a brushfire. In present circumstances, the holding of military manocurves in Iarnel close to the demarcation lines increases uncludy on the other side. It is necessary that the Governments should keep the altuntion well in hand, that they should take all possible measures to avoid incidents, that illegal crossings of the, demarcation lines increases uncledy on the other side. It is necessary that the Governments should keep the altuntion well in hand, that they should take all possible measures to avoid incidents, that illegal crossings of the defensive organization of both partice, particularly in the semi-live areas like the Jerusalem area.

This raises the vexed question of retaliation to which the document refers. This choice of method, the "dangerous remedy." as the apport calls it, is none of Israel's seeking but neither is the continuous armed infiltration by Jordan across the border resulting in murders like that of the two Israel soldiers at Bir Ma'in last week or the watchman at Ramiel Raziel a short while previously.
